Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 6,36-41are rejected under 35 U.S.C. 102(b) as being anticipated by Palestrant. The claims are directly readable on a surgical tool used in combination with a CT scanner. The tool includes a display 34 which indicates differences between the position of the tool and a desired position (horizontal). It should be noted that the use of light beams 90,92 and reference line 94 allows one to determine the actual position of the means for indicating with respect to the scan plane of the patient.

Allowable Subject Matter

Claims 1,7-13,15,22,26,29,31 are allowable over the prior art of record.

Response to Arguments

Applicant's arguments filed March 28, 2003 have been fully considered but they are not persuasive. The examiner does not agree with the applicant's interpretation of the claim language with respect to the Palestrant reference. Using the laser lines 90,92, reference line 94, and their position with respect to the known position of the scan planes 84,86, one can determine the actual position of the means for indicating with respect to the patient. Furthermore, the angle indicator, laser lines, reference line 94 and the level will allow one to determine the position of the tool and track its position with respect to the patient.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

Art Unit: 3737

In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
